Subject: my suggestion

I suggest you check out what parramatta council has done in regard to revilalising its entertainment district, they have ripped up MALLS and put STREET (one way) back in..... Yes put ROADS back into its malls,

The mall was grotty/neglected/ rubbish/graffiti/anti social area, down by the river.....however recently they street scaped it and put back the street for cars to travel down..... this has brought back LIFE into an area almost dead where people were scared to walk and be seen of a night....

I am the first to say george street is polluted and noisy with cars/buses/trucks etc.... however there needs to be a balance, I suggest george street should be one way and aimed at local traffic with no heavy traffic/buses, yes get wride of the carl expressway, however the traffice over the sydney harbour bridge needs to go some where, may be another tunnel, under town hall inl action to connect traffice up george street and out of the city.... perhaps a central bus terminal (like perth has) for the buses.

best regards
