Dear 2030 Team

RE: Final Consultation Draft of the Sustainable Sydney 2030 plan

Coffey Projects have reviewed in detail the Final Consultation Draft of the Sustainable Sydney 2030 plan.

We believe that this Strategic Plan is a bold and visionary step by the City of Sydney to create a benchmark model for reshaping, revitalising and guaranteeing a sustainable future for our great city.

Coffey Projects believes that through our long successful history of delivering on multi-disciplinary projects in the Private and Public sector and our active involvement in the Tourism & Transport Forum (TTF) and Infrastructure Partnerships Australia (IPA) we can provide effective and real solutions to enable Sustainable Sydney 2030 to move from idea to reality.

We wholly support the initiatives contained within this visionary plan and recognise that the next critical step is gaining consensus from both Government and the Private Sector along with developing funding and procurement models that can ensure that this vision becomes reality.

We look forward to exploring the opportunity of working with the City of Sydney Council to develop and deliver these important initiatives for Sydney.

Sincerely Yours,

A handwritten signature in blue ink, appearing to read "D Williams".

David Williams
NSW Regional Manager
