

# On-street outdoor dining kit

# What's on offer

---

## Introduction

This document outlines the items the City will provide for on-street outdoor dining areas, as well as two example layouts. It supplements our official [outdoor dining guidelines](#).

If you have any queries, please call us on 02 9265 9333.

---

## Kit provided by the City

### Concrete safety barriers

The City will provide the necessary safety barriers for your site, regardless of size. These will be installed and removed for free.

The barriers will be covered in decal artwork. You can choose from one of ten artwork designs, see pages 4-6. These artworks have been licenced by the City of Sydney.

If you prefer to cover the concrete barriers in your own choice of design, at your own cost, this is possible. Select the “bespoke design” option on your application form. Note: your application will take longer to approve and will include some fees.

## On-street outdoor dining kit

### Wheel stops and ramps

We will provide wheel stops and ramps if your area needs them. We will determine this at a site inspection.

---

## What you can include in your area

You can include the following in your on-street dining area:

- Tables and chairs
- Umbrellas
- Plants
- Synthetic grass – this is permitted only if it is maintained in a safe, clean and presentable state at all times.

Furniture items must adhere to our [outdoor dining guidelines](#).

## Artworks

*Colouring Memory* by Dennis Golding

*You Rocked My Heart, Trev* by Emily Parsons-Lord

*Heavy Light* by Andrew Christie X Sprung!! Dance

On-street

*Offering* by Elizabeth West

*Equivalence* by Ash Garwood

*Faraway Gums* by Billy Ryan

On-street  
outdoor dining kit

*yarrayarrayarra* by Suzy Evans

*Koala 4ever* by Elin Matilda Andersson

*Waves Like Trees You Can't Imagine* by Zev Tropp

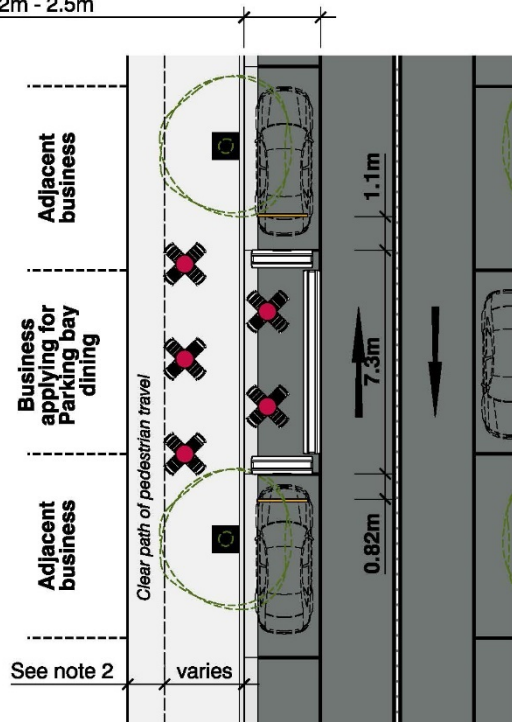

*Dancing fig trees* by Richard Briggs

## Example 1

Axonometric view

Parking bay width varies  
2m - 2.5m

Typical plan

### Legend

-  Cafe table and chairs
-  6m long concrete jersey barrier
-  Wheel stop

### General notes

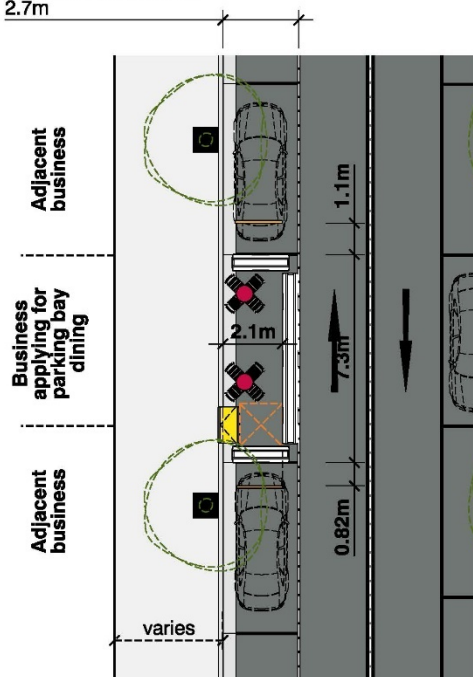

1. Dining furniture and layout of table and chairs must adhere to social distancing requirements.
2. A minimum 1.8m clear path of travel must be maintained along building shoreline. A reduction to 1.2m may be considered if there are wider passing spaces.
3. This option does not provide ramp access to parking bay dining area. Option is only feasible if alternate seating is available on the footpath.

## Example 2 – ramp is required where there is no footpath dining

### Axonometric view

Parking bay width min. to accommodate ramp & wheelchair circulation  
2.7m

### Typical plan

#### Legend

-  Cafe table and chairs
-  6m long concrete jersey barrier
-  Wheel stop
-  Safekerb Supagrip Ramp
-  Wheelchair circulation for 90 deg. turn (1.5 x 1.5m)

#### General notes

1. Dining furniture and layout of table and chairs must adhere to social distancing requirements.
2. Where footpath dining cannot be accommodated, parking bay dining must be made accessible with ramp access. To accommodate ramp and wheelchair circulation, 2.1m clear from the face of kerb is required and width of dining area will need to be greater than 6m to allow for two tables.
